# Where comfort & design meet outdoor living

At Eurofase Heating, we pride ourselves on developing products that meet the highest quality and safety standards while at the same time keeping our eyes on the latest architectural trends to ensure that our products bring added function and form to your space.

Imagine investing in patio furniture, a BBQ grill, or any other expensive outdoor furnishings but not being able to enjoy your space all year round because of weather constraints. Forced air heating systems can be ineffective in outdoor spaces, which may lead you to use structures such as fire pits. Although beautiful, its inability to heat large spaces or have ease of control may create more strife than pleasure.

# At Eurofase Heating, we choose infrared

Eurofase Heating has an ideal approach to keep you warm. Infrared heaters instantly distribute heat evenly without having to worry about ventilation requirements or wind conditions. These silent heaters enable you to enjoy quality time with friends and family indoor or outdoor. Eurofase Heating helps create a safe and sustainable space for yourself and your loved ones!

Infrared heaters emit a clean and safe beam of light that primarily heats objects rather than the surrounding air. This results in an immediate feeling of warmth. Infrared heat is evenly distributed and unaffected by factors like drafts or wind, providing consistent comfort.

FEATURES The perfect blend of functionality and aesthetics can elevate any outdoor area. Offering a lifestyle experience, these heaters are remarkably precise and versatile. The Eurofase 1500 Watt 120V heater effectively warms an area of approximately 5 x 6 feet and is recommended for installation at a maximum height of 8 feet above the ground. Eurofase provides the EF15 series in a standard Black, Stainless Steel or White finish and offers the option to upgrade a custom finish to complement any patio decor.

6 Step Outside With Eurofase.

# **TIMERS & DIMMERS**

At Eurofase Heating, we strive to provide our customers with the means to create a cozy, comfortable space with a single press. We make having a luxurious and relaxed environment easy with our controls so that you can enjoy your space no matter your preference.

All Eurofase heaters are compatible with timers, dimmers, and a combination of both, offering you the flexibility to optimize the infrared heatwaves emitted from our heaters. Please note that a control box is required to enable dimmer functionality. This feature enables you to regulate the heat flow from 0 to 100 percent, providing you with absolute flexibility to determine the duration of heater operation.

Custom configurations (weather proof, surface mounted, etc.) are

# TIMER (ONLY) DIMMER (ONLY) Gate 4 HOUR CHILD 2 HOUR --

SKU#: EFSWT

SKU#: EFSWD

## Good to know...

To ensure optimal performance and longevity of the heater, it is recommended to observe a 15-minute cool-down period after 4 hours of continuous usage. Our timers are specifically designed to contribute to optimal heater performance.

## TIMER WITH DIMMER (COMBINATIONS UP TO 1 TIMER + 4 DIMMERS)

SKU#:EFSWTD2

# **CREATE YOUR SPACE**

## **VISIT US ONLINE**

Take control of your space with our user-friendly, drag-and-drop tools. Achieve the optimal layout by dragging and dropping the selected heater into your space to simulate the heat coverage.

eurofaseheating.com/createyourspace/

## PRO TIP

It's preferable to slightly overheat a space than to underheat it. Opting for a slightly larger heater ensures better coverage, particularly with infrared heaters that primarily warm people and objects.

30 Step Outside With Eurofase.
